PREPARATION CHECKLIST FOR INITIAL SERVICE AND FOLLOW-UP SERVICES FOR BED BUGS

To enable the technician to perform the most thorough treatment possible, the homeowner/resident *MUST* perform the following steps in all agreed upon treatment areas:

1. ***DRY all clothing in the Hottest Dry cycle for at least 35 minutes.***
2. Seal all washed/dried items in sealed containers with secured lids.
3. Remove ALL items from closet floor and closet shelving areas and put in sealed containers.
4. Remove ALL items from dresser drawers and place in sealed containers with secured lids.
5. Remove dresser drawers from dresser cabinet and place on floor.
6. Remove all bedding (sheets, pillows comforters) and place in sealed containers after drying on the hottest setting for at least 35 minutes.
7. Remove mattress and box springs from bed frame and place UPRIGHT against walls.
8. We will need to cut and/or remove the dust cover (cheese cloth) under furniture and box springs.
Please Note: The dust cover will be damaged, will not be replaced and will be discarded.
9. Unscrew and remove ALL light switch and electric outlet covers (*we need to dust these voids*).
10. After treatment, **mattress & box springs must be placed inside zippered bed bug proof total encasement covers*.**

*We only recommend high quality; Entomology Lab Certified Bed Bug Proof mattress and box spring encasements. These can be ordered through The Ohio Exterminating Co. upon request.

Sets: Twin \$95.00 plus tax, Full \$115.00 plus tax, Queen \$128.00 plus tax, King \$148.00 plus tax

FLOORS We need access to all perimeter baseboard areas. Please move all stored items approximately 3 feet from walls. After treatment, **you must stay off of furniture and beds for approximately 4 hours until dry and stay out of the home for a couple of hours or until the product is dry.**

SPECIAL NOTES All occupants, especially infants and persons with heart or respiratory problems should be out of the treated area until the liquid product dries (minimum 4 hours). All pets (including birds, reptiles and fish) must be removed from the area to be treated. If pets cannot be removed, air pumps must be disconnected and the tanks sealed with plastic. The materials used are all EPA approved, applied according to the label and non-hazardous when dry. The treatment will not harm houseplants.
