

TERMITES

Unfortunately, your homeowners insurance doesn't cover the damage they do.

They're a homeowner's worst nightmare and 99% of the time they are discovered after damage has already taken place. The termites doing all the damage are hidden but once a year they show themselves as they fly out of their established colony in search of starting a new one.

SIGNS OF ACTIVITY & DAMAGE

- ✦ FIRST OBVIOUS SIGN IS SWARMING TERMITES HEAVILY COMING OUT ONE LOCATION.

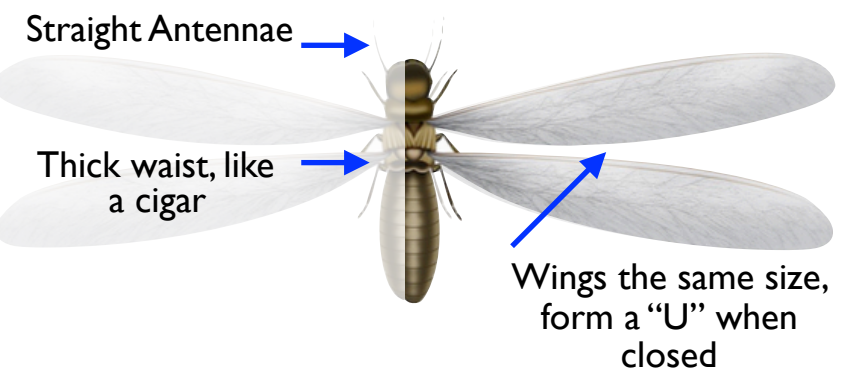

- ✦ WALK DOWN INTO UNFINISHED BASEMENT, LOOK AROUND. MUD TUBES ON THE WALL, AND ROTTING WOOD ON THE BEAMS CAN BE NOTICEABLE.

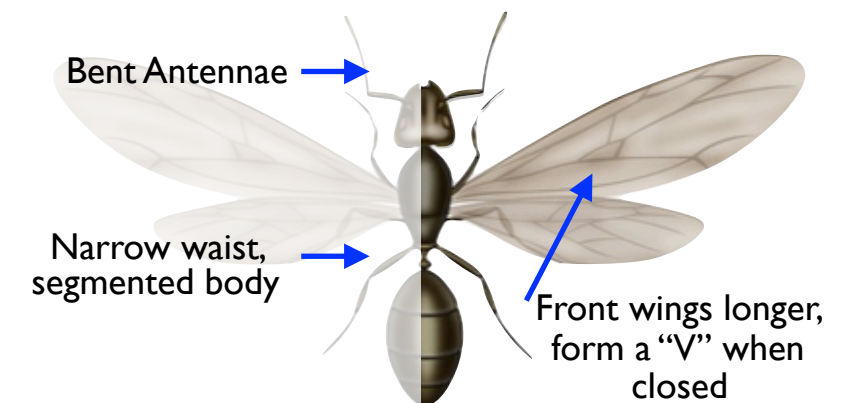

- ✦ TRANSLUCENT "U" WINGS SCATTERED AROUND SPECIFIC AREA.

DIFFERENCES BETWEEN SWARMING TERMITES & ANTS

SWARMING TERMITES

SWARMING ANTS

DID YOU KNOW THAT ANTS CAN FLY?

Let us help you ID what you find, and cross your fingers that we can inform you that they are actually flying ants, as we both smile in relief.
