- 1/5 of the cases were from Franklin County.
- Out of the 27 counties, **Franklin County had 65%** of the mosquitos that tested positive for WNV.

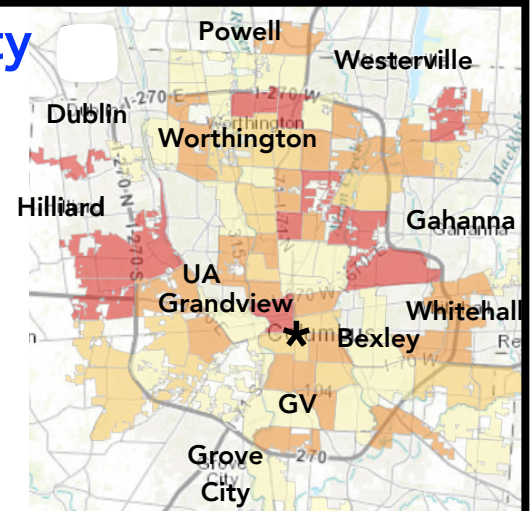

### 2015 Activity

**Positive West Nile Virus Mosquito Tests**

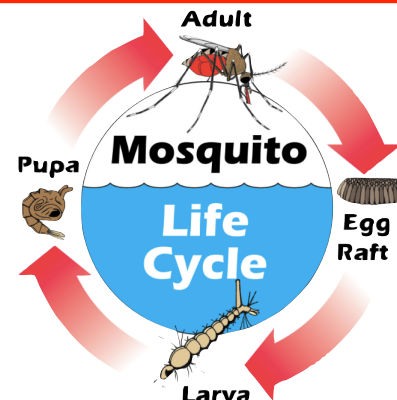

### 2015 Density

**Mosquito Count-snapshot for the month of August**

**Did you know that mosquitos need water to breed .....**  **and it can be something as little as water in a bottle cap?**

- One female can lay 100-300 eggs at a time, up to every three days.
- Eggs only need 1 week in the standing water to grow to an adult.

## How can you QUIT the ITCH?

**DRAIN** All standing water around your property, every 7 days.

**DRESS/DEET** Wear long sleeves/pants (especially dusk to dawn) and use repellent with DEET.

**DEFEND** Hire a professional to apply products that control adult mosquitos (adulticides) AND prevent the eggs/larvae to develop into adults (larvicides).

**We offer the most advanced mosquito products available.**
